

Comments:

- The GitHub repository has the prompt logs, generated RTL modules, and testbenches.
- Added comprehensive instructions for reproducing the simulation in the README file.
- Provided the run logs for synthesis.
- Provided with detailed docs with challenges, strategy, lessons, and design methodology.

-- Overall, the DP1 requirements have been met.

Kindly review the repository for potential improvements by cleaning up and removing unnecessary or duplicate files. Ensure that the directory is well-organized, with files placed in their appropriate locations. Only retain the necessary files to maintain clarity and efficiency.
